

Our company takes a responsible interest in the environment and what impact our operations may have on it.

We seek to act in accordance with best practice, comply fully with all relevant legislation and where possible to enhance the quality of the environment, reduce CO2 affects and recycle materials as appropriate.

We will co-operate with national and local government authorities with responsibility for the regulation and monitoring of our business activities likely to have an adverse effect on the environment.

We will adopt procedures to identify and assess risk to the environment posed by our activities.

We will seek to continually be aware of developments in materials and processes and where possible adopt alternatives to further reduce harm to the environment.

We will inform, instruct and train our employees in the proper handling, discharge, recycling and/or disposal of substances likely to harm the environment.

Our employees are required to ensure that they act responsibly and comply with current environmental standards and have regard to the achievement of those standards as a minimum.

With particular reference to;

- ◆ The control of all substances that may be hazardous to the environment.
- ◆ Energy use in buildings to enable conservation.
- ◆ The use of plant and vehicles.
- ◆ The prevention of unnecessary waste and the control of refuse and recycling of waste/materials.
- ◆ The effective operation of emergency call-out procedures.
- ◆ Control of plant and equipment in all activities.

By implementing and managing this policy we aim to contribute to the effective improvement of environmental performance.
